

Certificate of Completion

This confirms that between November 2023 and March 2024,

participated in ten (10) hours of professional development focused on preparing and engaging the public in the total solar eclipse that took place on April 8, 2024. Live sessions focused on helping people of all ages and backgrounds fully experience the awe and wonder of totality. Facilitators were staff educators at the Astronomical Society of the Pacific. Support for ASP Eclipse Stars came from the National Science Foundation.
